Braided hose V8-1SN

Art. No.: V8-1SN10

List number: 25025200

Hydraulic hose for medium pressure applications, according to EN 853 - 1SN

Product info

DN: Size: 6 inch: 3/8 bending radius [mm]: 130 working pressure [bar]: 180 burst pressure [bar]: 720 Outer Ø max. [mm]: 118,1 Inner diameter max [mm]: 10,1 Inner diameter min [mm]: 9,3 Static test pressure [bar]: 360 Safety factor: 4:1 Standard ferrule: VC2-06 Vacuum [bar]: -0,8 Color cover: black Cover: black Cover: Synthetic rubber, wear resistant, black Inner tube: MSHA-Approval: no Media: water and water-based media up to max. +70 ° C; Hydraulic oil based on mi oil and water emulsions and aqueous glycol solutions Norm/Standards: EN 853 - 15N Reinforcement: 1 layer of high tensile steel wire	<u>Specifications</u>	
Size: 6 inch: 3/8 bending radius [mm]: 130 working pressure [bar]: 180 burst pressure [bar]: 720 Outer Ø max. [mm]: 18,1 Inner diameter max [mm]: 10,1 Inner diameter min [mm]: 9,3 Static test pressure [bar]: 360 Safety factor: 4:1 Standard ferrule: VC2-06 Vacuum [bar]: -0,8 Color cover: black Color inner tube: black Cover: Synthetic rubber, wear resistant, black Inner tube: Synthetic rubber MSHA-Approval: no Media: water and water-based media up to max. +70 ° C; Hydraulic oil based on mi oil and water emulsions and aqueous glycol solutions Norm/Standards: EN 853 - 1SN Reinforcement: 1 layer of high tensile steel wire Temperature range [°C]: -40 ° C to + 100 ° C, water and water-based media up to +70 ° C; Hydraulic based on mineral oil and water emulsions and aqueous glycol solutions		10
inch: bending radius [mm]: 130 working pressure [bar]: 180 burst pressure [bar]: 720 Outer Ø max. [mm]: 18,1 Inner diameter max [mm]: 10,1 Inner diameter min [mm]: 9,3 Static test pressure [bar]: 360 Safety factor: 4:1 Standard ferrule: VC2-06 Vacuum [bar]: -0,8 Color cover: black Color inner tube: black Cover: Synthetic rubber, wear resistant, black Inner tube: MSHA-Approval: no Media: water and water-based media up to max. +70 ° C; Hydraulic oil based on minoil and water emulsions and aqueous glycol solutions Norm/Standards: EN 853 - 1SN Reinforcement: 1 layer of high tensile steel wire -40 ° C to + 100 ° C, water and water-based media up to +70 ° C; Hydraulic based on mineral oil and water emulsions and aqueous glycol solutions		
bending radius [mm]: 130 working pressure [bar]: 180 burst pressure [bar]: 720 Outer Ø max. [mm]: 18,1 Inner diameter max [mm]: 10,1 Inner diameter min [mm]: 9,3 Static test pressure [bar]: 360 Safety factor: 4:1 Standard ferrule: VC2-06 Vacuum [bar]: -0,8 Color cover: black Color inner tube: black Cover: Synthetic rubber, wear resistant, black Inner tube: Synthetic rubber MSHA-Approval: no Media: water and water-based media up to max. +70 ° C; Hydraulic oil based on mioil and water emulsions and aqueous glycol solutions Norm/Standards: EN 853 - 1SN Reinforcement: 1 layer of high tensile steel wire -40 ° C to + 100 ° C, water and water emulsions and aqueous glycol solutions		
working pressure [bar]: 180 burst pressure [bar]: 720 Outer Ø max. [mm]: 18,1 Inner diameter max [mm]: 10,1 Inner diameter min [mm]: 9,3 Static test pressure [bar]: 360 Safety factor: 4:1 Standard ferrule: VC2-06 Vacuum [bar]: -0,8 Color cover: black Color inner tube: black Cover: Synthetic rubber, wear resistant, black Inner tube: Synthetic rubber MSHA-Approval: no Media: water and water-based media up to max. +70 ° C; Hydraulic oil based on minoil and water emulsions and aqueous glycol solutions Reinforcement: 1 layer of high tensile steel wire Temperature range [°C]: black counter of the properties		
Durst pressure [bar]: 720 Outer Ø max. [mm]: 18,1 Inner diameter max [mm]: 10,1 Inner diameter min [mm]: 9,3 Static test pressure [bar]: 360 Safety factor: 4:1 Standard ferrule: VC2-06 Vacuum [bar]: -0,8 Color cover: black Color inner tube: black Cover: Synthetic rubber, wear resistant, black Inner tube: Synthetic rubber MSHA-Approval: no Media: water and water-based media up to max. +70 ° C; Hydraulic oil based on mioil and water emulsions and aqueous glycol solutions Norm/Standards: EN 853 - 1SN Reinforcement: 1 layer of high tensile steel wire Temperature range [°C]: december 19,33 Temperature range glycol solutions		
Outer Ø max. [mm]: 18,1 Inner diameter max [mm]: 10,1 Inner diameter min [mm]: 9,3 Static test pressure [bar]: 360 Safety factor: 4:1 Standard ferrule: VC2-06 Vacuum [bar]: -0,8 Color cover: black Color inner tube: black Cover: Synthetic rubber, wear resistant, black Inner tube: Synthetic rubber MSHA-Approval: no Media: water and water-based media up to max. +70 ° C; Hydraulic oil based on miner oil and water emulsions and aqueous glycol solutions Norm/Standards: EN 853 - 1SN Reinforcement: 1 layer of high tensile steel wire Temperature range [°C]: -40 ° C to + 100 ° C, water and water-based media up to +70 ° C; Hydraulic based on mineral oil and water emulsions and aqueous glycol solutions		
Inner diameter max [mm]: 10,1 Inner diameter min [mm]: 9,3 Static test pressure [bar]: 360 Safety factor: 4:1 Standard ferrule: VC2-06 Vacuum [bar]: -0,8 Color cover: black Color inner tube: black Cover: Synthetic rubber, wear resistant, black Inner tube: Synthetic rubber MSHA-Approval: no Media: water and water-based media up to max. +70 ° C; Hydraulic oil based on mio oil and water emulsions and aqueous glycol solutions Norm/Standards: EN 853 - 15N Reinforcement: 1 layer of high tensile steel wire Temperature range [°C]: -40 ° C to + 100 ° C, water and water-based media up to + 70 ° C; Hydraulic based on mineral oil and water emulsions and aqueous glycol solutions		
Inner diameter min [mm]: Static test pressure [bar]: 360 Safety factor: 4:1 Standard ferrule: VC2-06 Vacuum [bar]: Color cover: black Color inner tube: black Cover: Synthetic rubber, wear resistant, black Inner tube: MSHA-Approval: no Media: Water and water-based media up to max. +70 ° C; Hydraulic oil based on mi oil and water emulsions and aqueous glycol solutions Norm/Standards: EN 853 - 1SN Reinforcement: 1 layer of high tensile steel wire -40 ° C to + 100 ° C, water and water-based media up to + 70 ° C; Hydraulic based on mineral oil and water emulsions and aqueous glycol solutions		<u> </u>
Static test pressure [bar]: Safety factor: 4:1 Standard ferrule: VC2-06 Vacuum [bar]: Color cover: black Cover: Synthetic rubber, wear resistant, black Inner tube: Synthetic rubber MSHA-Approval: no Media: Water and water-based media up to max. +70 ° C; Hydraulic oil based on mi oil and water emulsions and aqueous glycol solutions Norm/Standards: EN 853 - 1SN Reinforcement: 1 layer of high tensile steel wire Temperature range [°C]: -40 ° C to + 100 ° C, water and water-based media up to +70 ° C; Hydraulic based on mineral oil and water emulsions and aqueous glycol solutions	nner diameter max [mm]:	10,1
Safety factor: Standard ferrule: VC2-06 Vacuum [bar]: Color cover: black Color inner tube: black Cover: Synthetic rubber, wear resistant, black Inner tube: MSHA-Approval: no Media: Media: Water and water-based media up to max. +70 ° C; Hydraulic oil based on mi oil and water emulsions and aqueous glycol solutions Norm/Standards: EN 853 - 1SN Reinforcement: 1 layer of high tensile steel wire -40 ° C to + 100 ° C, water and water-based media up to + 70 ° C; Hydraulic based on mineral oil and water emulsions and aqueous glycol solutions	nner diameter min [mm]:	9,3
Standard ferrule: VC2-06 Vacuum [bar]: -0,8 Color cover: black Cover: Synthetic rubber, wear resistant, black Inner tube: Synthetic rubber MSHA-Approval: no Media: water and water-based media up to max. +70 ° C; Hydraulic oil based on mi oil and water emulsions and aqueous glycol solutions Norm/Standards: EN 853 - 15N Reinforcement: 1 layer of high tensile steel wire Temperature range [°C]: -40 ° C to + 100 ° C, water and water-based media up to +70 ° C; Hydraulic based on mineral oil and water emulsions and aqueous glycol solutions	Static test pressure [bar]:	360
Vacuum [bar]: -0,8 Color cover: black Color inner tube: black Cover: Synthetic rubber, wear resistant, black Inner tube: Synthetic rubber MSHA-Approval: no water and water-based media up to max. +70 ° C; Hydraulic oil based on mi oil and water emulsions and aqueous glycol solutions Norm/Standards: EN 853 - 1SN Reinforcement: 1 layer of high tensile steel wire Temperature range [°C]: -40 ° C to + 100 ° C, water and water-based media up to + 70 ° C; Hydraulic based on mineral oil and water emulsions and aqueous glycol solutions	Safety factor:	4:1
Color inner tube: Cover: Synthetic rubber, wear resistant, black Inner tube: Synthetic rubber MSHA-Approval: no Media: water and water-based media up to max. +70 ° C; Hydraulic oil based on mioil and water emulsions and aqueous glycol solutions Norm/Standards: EN 853 - 1SN Reinforcement: 1 layer of high tensile steel wire Temperature range [°C]: layer of high tensile steel water emulsions and aqueous glycol solutions	Standard ferrule:	<u>VC2-06</u>
Color inner tube: Cover: Synthetic rubber, wear resistant, black Inner tube: Synthetic rubber MSHA-Approval: no water and water-based media up to max. +70 ° C; Hydraulic oil based on mi oil and water emulsions and aqueous glycol solutions Norm/Standards: EN 853 - 1SN Reinforcement: 1 layer of high tensile steel wire - 40 ° C to + 100 ° C, water and water-based media up to +70 ° C; Hydraulic based on mineral oil and water emulsions and aqueous glycol solutions	Vacuum [bar]:	-0,8
Cover: Synthetic rubber, wear resistant, black Inner tube: Synthetic rubber MSHA-Approval: no Media: water and water-based media up to max. +70 ° C; Hydraulic oil based on mi oil and water emulsions and aqueous glycol solutions Norm/Standards: EN 853 - 1SN Reinforcement: 1 layer of high tensile steel wire Temperature range [°C]: -40 ° C to + 100 ° C, water and water-based media up to +70 ° C; Hydraulic based on mineral oil and water emulsions and aqueous glycol solutions	Color cover:	black
Inner tube: Synthetic rubber MSHA-Approval: no water and water-based media up to max. +70 ° C; Hydraulic oil based on mi oil and water emulsions and aqueous glycol solutions Norm/Standards: EN 853 - 1SN Reinforcement: 1 layer of high tensile steel wire Temperature range [°C]: -40 ° C to + 100 ° C, water and water-based media up to +70 ° C; Hydraulic based on mineral oil and water emulsions and aqueous glycol solutions	Color inner tube:	black
MSHA-Approval: Media: water and water-based media up to max. +70 ° C; Hydraulic oil based on mi oil and water emulsions and aqueous glycol solutions Norm/Standards: EN 853 - 1SN Reinforcement: 1 layer of high tensile steel wire -40 ° C to + 100 ° C, water and water-based media up to +70 ° C; Hydraulic based on mineral oil and water emulsions and aqueous glycol solutions	Cover:	Synthetic rubber, wear resistant, black
Media:water and water-based media up to max. +70 ° C; Hydraulic oil based on mi oil and water emulsions and aqueous glycol solutionsNorm/Standards:EN 853 - 1SNReinforcement:1 layer of high tensile steel wireTemperature range [°C]:-40 ° C to + 100 ° C, water and water-based media up to + 70 ° C; Hydraulic based on mineral oil and water emulsions and aqueous glycol solutions	Inner tube:	Synthetic rubber
Norm/Standards: EN 853 - 1SN Reinforcement: 1 layer of high tensile steel wire - 40 ° C to + 100 ° C, water and water-based media up to + 70 ° C; Hydraulic based on mineral oil and water emulsions and aqueous glycol solutions	MSHA-Approval:	no
Reinforcement: 1 layer of high tensile steel wire - 40 ° C to + 100 ° C, water and water-based media up to + 70 ° C; Hydraulic based on mineral oil and water emulsions and aqueous glycol solutions	Media:	water and water-based media up to max. +70 $^{\circ}$ C; Hydraulic oil based on mineral oil and water emulsions and aqueous glycol solutions
Temperature range [°C]: - 40 ° C to + 100 ° C, water and water-based media up to + 70 ° C; Hydraulic based on mineral oil and water emulsions and aqueous glycol solutions	Norm/Standards:	EN 853 - 1SN
based on mineral oil and water emulsions and aqueous glycol solutions	Reinforcement:	1 layer of high tensile steel wire
application: medium pressure applications	Temperature range [°C]:	- 40 $^{\circ}$ C to + 100 $^{\circ}$ C, water and water-based media up to + 70 $^{\circ}$ C; Hydraulic oil based on mineral oil and water emulsions and aqueous glycol solutions
	application:	medium pressure applications
max operating temperature [°C]: +100°C	max operating temperature [°C]:	+100°C
number of layers: 1	number of layers:	1

Practical tip

When laying the hose line make sure to comply with the minimum bending radius. An underflow can reduce operating life significantly.

Reserve technical changes.
